## TECHNICAL DATA SHEET

Citric Bathroom Descaler - Alkaline

### 1. PRODUCT IDENTIFICATION

|                    |                                                                                     |
|--------------------|-------------------------------------------------------------------------------------|
| Product name       | Citric Bathroom Descaler - Alkaline                                                 |
| Brand              | Alle's ClinX                                                                        |
| Product code / SKU | ACX-1235-VAR                                                                        |
| Product category   | Washroom / mineral-deposit cleaning                                                 |
| Product form       | Ready-to-use liquid                                                                 |
| Intended market    | Healthcare / Hospitality / Education / Industrial                                   |
| GHS pictogram      |  |

### 2. PRODUCT DESCRIPTION

Citric Bathroom Descaler - Alkaline is a professional washroom / mineral-deposit cleaning product based on Alkaline surfactant blend — bathroom and tile cleaner, with a stated pH of 10.0–11.0 (alkaline). This sheet summarises supported identity, compatibility, safety, storage and packaging information.

### 3. KEY FEATURES AND BENEFITS

| Feature                                               | User / operational benefit                                            |
|-------------------------------------------------------|-----------------------------------------------------------------------|
| Alkaline surfactant blend — bathroom and tile cleaner | Defines the formulation / active system used to identify the product. |
| pH: 10.0–11.0 (alkaline)                              | Supports compatibility and handling decisions.                        |
| Defined compatible-use scope                          | Approved areas / surfaces are stated for easier site selection.       |

### 4. APPLICATIONS

|                          |                                                                                |
|--------------------------|--------------------------------------------------------------------------------|
| Recommended environments | Healthcare / Hospitality / Education / Industrial                              |
| Recommended tasks        | Washroom / mineral-deposit cleaning                                            |
| Use on                   | Ceramic tiles, porcelain, bathroom fixtures, sinks, shower trays, WC exteriors |
| Do not use on            | marble and acid-sensitive stone                                                |

5. TECHNICAL SPECIFICATIONS

| Property           | Specification                                         |
|--------------------|-------------------------------------------------------|
| Active / chemistry | Alkaline surfactant blend — bathroom and tile cleaner |
| pH                 | 10.0–11.0 (alkaline)                                  |
| Product form       | Ready-to-use liquid                                   |
| Specific gravity   | 1.01–1.03 at 25°C                                     |
| Pack size          | 5 Litres                                              |

6. SAFETY AND HANDLING SUMMARY

|                                           |                                                                                     |
|-------------------------------------------|-------------------------------------------------------------------------------------|
| PPE                                       | None at standard use                                                                |
| Critical restrictions / incompatibilities | Toilet bowl interior (use Toilet Cleaner) · Natural marble and acid-sensitive stone |
| First aid / spill reference               | Refer to the current product SDS, label and site emergency procedure.               |

7. STORAGE AND SHELF LIFE

|                        |                                                                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Storage conditions     | Keep in the original sealed container, away from direct sunlight and incompatible materials; follow current label / SDS storage limits. |
| Storage temperature    | Follow current label / SDS                                                                                                              |
| Shelf life - unopened  | 24 months from date of manufacture, unopened                                                                                            |
| Container requirements | Original, correctly labelled, tightly closed container unless the approved pack states otherwise.                                       |
