Core cleaning operations - 10 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
01	Daily Cleaning Checklist	A shift-level control sheet for routine cleaning completion, exceptions and supervisor verification.
02	Area Cleaning Schedule	Assign what is cleaned, how often, with which method, by whom, and how completion is verified.
03	Cleaning Frequency Matrix	A simple matrix to convert facility risk and usage into a visible cleaning frequency plan.
04	High-Touch Surface Checklist	A focused checklist for surfaces touched repeatedly by occupants, visitors and staff.
05	Washroom Inspection Checklist	A rapid operational inspection for cleanliness, supplies, defects and user readiness.
06	Deep Cleaning Checklist	A controlled sequence for periodic cleaning beyond the routine daily scope.
07	Opening Hygiene Checklist	A pre-opening check to confirm that public and staff areas are clean, stocked and safe for occupancy.
08	Closing Hygiene Checklist	A close-of-day control to leave the facility clean, secured and ready for the next operating period.
09	Housekeeping Shift Handover Sheet	A concise handover so the next shift can see priorities, restrictions, stock issues and unresolved work immediately.
10	Weekly / Monthly Periodic Cleaning Log	A completion record for tasks that are not performed every shift or every day.

Library approach. Each PDF is designed as a usable operational tool first; short Learn articles can later explain when and how to use each resource.

Chemical management & safety - 10 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
11	Chemical Dilution Log	Record preparation of diluted cleaning solutions for traceability, consistency and safe use.
12	Dilution Reference Chart	A calculation aid for concentrate-to-water ratios, plus blank rows for facility-approved product instructions.
13	Chemical Storage Inspection Checklist	A routine inspection of housekeeping chemical storage, segregation, identification and emergency readiness.
14	Chemical Stock Register	A simple inventory register to track movement, balance, reorder level and lot / shelf-life information.
15	SDS Register & Availability Checklist	Track whether current Safety Data Sheets are available, accessible and periodically reviewed for every active chemical.
16	Workplace Chemical Label Checklist	A practical check for clear identification of original, decanted and diluted chemical containers.
17	PPE Selection & Compliance Checklist	Connect each housekeeping task to the PPE specified by the product SDS, site risk assessment and operating procedure.
18	Chemical Spill Response Checklist	A controlled first-response checklist for housekeeping chemical spills before specialist escalation, when required.
19	Chemical Exposure / Incident Report	Capture the essential facts of a chemical exposure or housekeeping incident for escalation, investigation and follow-up.
20	Product & Surface Compatibility Checklist	A controlled record for approving, restricting or rejecting a cleaning product on a specific material or surface.

Equipment & housekeeping control - 5 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
21	Cleaning Equipment Inspection Checklist	A pre-use check for manual tools, machines and dispensing equipment used by housekeeping teams.
22	Cleaning Equipment Maintenance Log	Track faults, preventive maintenance, repairs and return-to-service decisions for housekeeping equipment.
23	Mop & Cleaning Cloth Reprocessing Log	Document collection, washing / reprocessing, drying, inspection and release of reusable cleaning textiles.
24	Cleaning Cart Preparation Checklist	Prepare a consistent, safe housekeeping cart before entering operational areas.
25	Housekeeping Supply Closet Checklist	A quick control for the small utility rooms and supply closets that often determine housekeeping consistency.

Facility Hygiene Resource Library

Training & competency - 6 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
26	New Housekeeping Staff Induction Checklist	A structured induction record before a new team member performs housekeeping tasks independently.
27	Staff Training Attendance Record	Document who attended a hygiene training session, what was covered and whether follow-up competency is required.
28	Cleaning Competency Assessment	A practical observation form to determine whether a team member can perform a cleaning task correctly and consistently.
29	Chemical Handling Competency Assessment	Verify that staff can identify, dilute, label, use and store housekeeping chemicals without unsafe improvisation.
30	Supervisor Practical Observation Checklist	A short on-the-floor observation tool for coaching technique and identifying drift from the approved method.
31	Refresher Training Tracker	Keep recurring training and competency reassessment visible before due dates are missed.

Facility Hygiene Resource Library

Audit & continuous improvement - 7 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
32	Supervisor Hygiene Inspection	A fast scored inspection for routine supervisory rounds, with immediate action ownership.
33	Internal Facility Hygiene Audit	A structured internal audit across governance, operations, chemicals, training and corrective-action control.
34	Pre-Audit Hygiene Readiness Checklist	A final readiness check before an internal, customer, certification or regulatory hygiene review.
35	Hygiene Non-Conformance Report	Record a requirement gap, immediate correction, risk, ownership and evidence of closure.
36	Corrective & Preventive Action - CAPA	A disciplined action record for recurring, significant or systemic hygiene failures.
37	Hygiene Improvement Action Plan	Convert audit findings, complaints or performance gaps into owned, dated improvement actions.
38	Monthly Hygiene KPI Review	A one-page management review of cleaning completion, audit performance, incidents, training, stock and complaints.

Facility Hygiene Resource Library

Consumption & procurement - 4 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
39	Chemical Reorder Planning Sheet	Turn average consumption, lead time and safety stock into a visible reorder decision.
40	Monthly Chemical Consumption Tracker	Track actual chemical use and convert inventory movement into a consistent monthly consumption view.
41	Chemical Cost-per-Use Worksheet	Compare concentrate economics using usable solution and dose per task - not only the purchase price of the pack.
42	Cleaning Chemical Supplier Comparison Sheet	Compare suppliers on usable economics, documentation and service rather than container price alone.

Facility Hygiene Resource Library

Sector-specific resources - 8 resources

Resources

NO.	RESOURCE	WHAT IT CONTROLS
43	Hospital Housekeeping Checklist	A general hospital housekeeping checklist to be adapted to the facility infection-prevention programme and area risk.
44	Hospital Terminal Cleaning Checklist	A discharge / transfer terminal-cleaning sequence to support local IPC procedures without prescribing a specific disinfectant.
45	High-Risk / Isolation Area Cleaning Checklist	A generic control sheet for areas subject to enhanced precautions; use only with the facility's IPC instructions.
46	Laundry Hygiene Checklist	A hygiene-control checklist for institutional laundry flow, with emphasis on separation, handling and clean storage.
47	Kitchen & Dietary Services Sanitation Checklist	A practical sanitation check for institutional kitchens and dietary-service areas; align with the site food-safety system.
48	Hotel Guest Room Turnover Checklist	A room-turnover control sheet that connects housekeeping completeness with guest readiness.
49	School Classroom & Washroom Hygiene Checklist	A simple daily checklist for education facilities covering shared learning spaces and student washrooms.
50	Office & Common Area Hygiene Checklist	A practical checklist for offices, reception areas, meeting rooms, pantry points and shared circulation spaces.
