Operational check

☐ All containers clearly identified and labels readable	OK / Action
☐ Products kept in original containers where practicable	OK / Action
☐ Caps / closures secure; no leaking or damaged packs	OK / Action
☐ Secondary containers controlled and labelled for their contents	OK / Action
☐ Incompatible chemical groups segregated according to SDS / facility rules	OK / Action
☐ No food, drink, medicines or personal items stored with chemicals	OK / Action
☐ Shelving stable; heavy containers stored safely	OK / Action
☐ Ventilation / temperature conditions acceptable for stored products	OK / Action
☐ Spill response materials available for the chemical inventory	OK / Action
☐ Current SDS information accessible to staff	OK / Action
☐ Stock rotation / expiry or shelf-life checks completed where applicable	OK / Action
☐ Storage secured against unauthorised access and housekeeping area kept clean	OK / Action

Control note. Use each product SDS to determine specific incompatibilities and storage conditions; this checklist does not replace that review.
