INSPECTOR

Operational check

☐ Product identity is visible and matches the actual contents	OK / Action
☐ Original supplier label remains readable and attached	OK / Action
☐ Hazard / precaution information on the supplied container is legible	OK / Action
☐ Decanted or working containers are identified according to facility rules	OK / Action
☐ Diluted solution container states the product identity	OK / Action
☐ Preparation date / use-by information recorded when required by the product or facility	OK / Action
☐ No unlabelled bottle, bucket or trigger sprayer in use or storage	OK / Action
☐ Damaged, wet or unreadable labels replaced before continued use	OK / Action
☐ Old labels removed before reusing an approved refillable container	OK / Action
☐ Containers never relabelled in a way that could conceal incompatible residues	OK / Action
☐ Staff know where to find the SDS and product instructions	OK / Action
☐ Non-compliant container isolated until identity is confirmed	OK / Action

Control note. Label content must follow applicable local requirements and the facility's hazard-communication procedure.
