

Chemical Spill Response Checklist

A controlled first-response checklist for housekeeping chemical spills before specialist escalation, when required.

FACILITY / SITE

LOCATION

DATE / TIME

RESPONDER

Operational check

☐ Stop the task and keep people away from the spill area	Done / Escalate
☐ Identify the product and locate the current SDS / emergency information	Done / Escalate
☐ Assess whether the spill is within trained staff capability; escalate if not	Done / Escalate
☐ Use the PPE specified for spill response / exposure risk	Done / Escalate
☐ Improve ventilation only where safe and appropriate	Done / Escalate
☐ Protect drains or sensitive areas when this can be done safely	Done / Escalate
☐ Contain the spill using compatible absorbent / control materials	Done / Escalate
☐ Collect contaminated material using the approved waste route	Done / Escalate
☐ Clean / decontaminate the affected surface as directed by SDS / procedure	Done / Escalate
☐ Remove PPE safely and wash hands after completion	Done / Escalate
☐ Record the spill, exposure or environmental release if applicable	Done / Escalate
☐ Replace used spill materials and close corrective actions	Done / Escalate

Control note. Do not improvise neutralisation or mix another chemical into a spill unless the SDS or a trained emergency procedure explicitly requires it.
