Operational check

☐ Room clean, dry and free from unrelated storage	OK / Action
☐ Chemicals labelled, closed and stored securely	OK / Action
☐ Incompatible products segregated according to SDS / facility rules	OK / Action
☐ Clean tools stored off the floor and protected from contamination	OK / Action
☐ Used / wet mops and cloths not stored with clean stock	OK / Action
☐ PPE stock available and organised	OK / Action
☐ SDS / emergency information accessible	OK / Action
☐ Spill materials available where required	OK / Action
☐ Dispensing / dilution point clean and leak-free	OK / Action
☐ No evidence of pests, uncontrolled moisture or drain problems	OK / Action
☐ Stock levels visible; shortages identified before shift demand	OK / Action
☐ Access controlled and housekeeping standard posted / understood	OK / Action

Control note. A well-controlled utility space reduces cross-contamination, stock loss and chemical-handling errors upstream.
