

# Carpet & Upholstery Shampoo - Low-Foam

Low-Foam Extraction Formula with Soil-Release Polymer + Fresh Floral Fragrance Carpet & Upholstery Deep Clean for banquet halls, function rooms & high-traffic soft furnishings

**20-30 ml/L (extraction) · 10 ml/500 ml (spot treatment)**

**DOSE / DILUTION**

Follow the current label and measure accurately.

**7.0-8.5 (mild alkaline)**

**PH / CHEMISTRY**

Reference value from current product data.

**5 Litres / Bulk**

**PACK**

Procurement / refill format.

**WARNING - GHS07**

H315 - Causes skin irritation. H319 - Causes serious eye irritation (concentrate).

## 01 What this guide helps you control

- Correct dose, dilution and application sequence for the intended task.
- Where the product fits, material limits and compatibility checks before use.
- PPE, stop-work conditions, storage and incident-response essentials.
- Direct access to the current SDS, technical documents and procurement resources.

# Application scope and controls

Where the product creates value, what PPE is needed, and what must be confirmed before use.

## 01 Operational value

01

**Low-foam extraction formula**

Maintains controlled foam levels for the intended manual or machine cleaning method.

02

**Soil-release polymer**

Supports effective soil removal and rinsing under the stated cleaning conditions.

03

**Fast-drying formulation**

Supports efficient application and drying under the stated professional use conditions.

04

**Fresh floral fragrance**

Provides a controlled fragrance profile suitable for routine institutional environments.

## 02 PPE and task controls

Protective gloves

Eye protection

## 03 Pre-use verification

- 01

**Read current SDS**

Confirm current label/SDS and site procedure before use.
- 02

**Confirm application**

Use only for the intended task, surface, equipment or hygiene purpose.
- 03

**Prepare the area**

Control access, remove incompatible products and arrange ventilation where needed.
- 04

**Prepare PPE**

Use the PPE stated in the SDS/product literature for concentrate handling and task risk.
- 05

**Prepare rinse / cleanup**

Have water, wipes or approved cleanup materials ready before starting.

# Controlled application sequence

20-30 ml/L (extraction) · 10 ml/500 ml (spot treatment) | Hot-water extraction machine / spot treatment cloth

## Prepare

**01**

Read the current label/SDS, confirm compatibility, isolate the task area and prepare PPE.

## Dose / dilute

**02**

20-30 ml/L (extraction) · 10 ml/500 ml (spot treatment)

## Extraction machine

**03**

Dilute 20-30 ml per litre of hot water in the machine's solution tank per manufacturer guidance. Clean in overlapping passes, allow to dry fully before returning furniture or resuming foot traffic.

## Spot treatment

**04**

For upholstery spot cleaning, dilute 10 ml per 500 ml water, apply to a clean cloth, blot the stain, then rinse the area with a clean damp cloth.

## Rinse / finish

**05**

Extracted by machine; rinse cloth-applied spots with clean water

## Verify

**06**

Confirm the required result, correct finish and safe condition before closing the task.

## Keep the chemistry controlled

More product, longer dwell time or mixing with another cleaner is not automatically safer or more effective. Stay within the current product instructions.

# Compatibility and application limits

Confirm the material, surface or equipment before application; avoid preventable damage and rework.

## 01 Compatibility

### Compatible after check

- Colourfast carpet fibres
- Compatible upholstery fabrics after spot test

### Verify before use

- Confirm against current product literature and site requirements.

## 02 Operational value

### 01 Low-foam extraction formula

Maintains controlled foam levels for the intended manual or machine cleaning method.

### 02 Soil-release polymer

Supports effective soil removal and rinsing under the stated cleaning conditions.

### 03 Fast-drying formulation

Supports efficient application and drying under the stated professional use conditions.

### 04 Fresh floral fragrance

Provides a controlled fragrance profile suitable for routine institutional environments.

# Incident response and escalation

Stop work early, protect people first, and use the current SDS and site emergency procedure.

## Stop work

Unexpected reaction, heat, fumes, odour or visible surface attack. Damaged or unlabelled container, uncertain product identity or uncertain compatibility. Splash/exposure event or uncontrolled spill.

## 01 First-aid summary

### Eyes

Flush eyes with clean water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. Continue rinsing and seek medical attention if irritation persists.

### Skin

Remove contaminated clothing. Rinse affected skin thoroughly with water. Wash with soap where appropriate. Seek medical attention if irritation, redness or pain persists.

### Inhalation

Move the affected person to fresh air and keep at rest. If breathing is difficult or symptoms persist, seek medical attention. Follow the current SDS and site emergency procedure.

### Ingestion

Do not induce vomiting. Rinse mouth with water. Do not give anything by mouth to an unconscious person. Seek medical attention promptly and provide the current SDS or product label.

## 02 Storage

Store in the original labelled container, tightly closed and upright, in a cool, dry, well-ventilated area. Keep away from incompatible materials and follow the current SDS Section 7 for product-specific storage conditions. Do not mix with other chemicals unless explicitly permitted by the current product instructions.
