

Concrete Floor Degreaser - Heavy-Duty Alkaline

Heavy-Duty Alkaline Degreaser with Deep-Penetrating Surfactant System + Solvent Boost Concrete & Industrial Floor Care for factory floors, warehouses & heavy machinery bays

1:5 to 1:20 depending on soil level

DOSE / DILUTION

Follow the current label and measure accurately.

11.0-13.0

PH / CHEMISTRY

Reference value from current product data.

5 Litres / Bulk

PACK

Procurement / refill format.

DANGER - GHS05

H314 - Causes severe skin burns and eye damage.

01 What this guide helps you control

- Correct dose, dilution and application sequence for the intended task.
- Where the product fits, material limits and compatibility checks before use.
- PPE, stop-work conditions, storage and incident-response essentials.
- Direct access to the current SDS, technical documents and procurement resources.

Application scope and controls

Where the product creates value, what PPE is needed, and what must be confirmed before use.

01 Operational value

01 Deep-penetrating formula

Supports consistent professional facility use when applied according to the current product instructions.

02 Solvent-boosted alkaline system

Provides alkaline cleaning action for the stated soil and professional application range.

03 Machine & manual application

Supports the stated professional application method when dosing and equipment controls are followed.

04 Reduces slip hazard

Supports removal of greasy soil that can contribute to unsafe floor conditions.

02 PPE and task controls

Protective gloves

Eye protection

Face shield where splash risk is significant

Respiratory protection only where site risk

03 Pre-use verification

01 Read current SDS

Confirm current label/SDS and site procedure before use.

02 Confirm application

Use only for the intended task, surface, equipment or hygiene purpose.

03 Prepare the area

Control access, remove incompatible products and arrange ventilation where needed.

04 Wear corrosive-duty PPE

Chemical-resistant gloves and eye/face protection are mandatory for concentrate handling.

05 Prepare rinse / cleanup

Have water, wipes or approved cleanup materials ready before starting.

Controlled application sequence

1:5 to 1:20 depending on soil level | Mop, scrubber-dryer, or pressure washer

Prepare

01

Read the current label/SDS, confirm compatibility, isolate the task area and prepare PPE.

Dilute

02

1:10 to 1:20 in water for routine cleaning; use neat or at 1:5 for heavily soiled or long-neglected areas.

Apply & agitate

03

apply with mop, scrubber-dryer or pressure washer, allow 5-10 minutes dwell time on heavy soiling, agitate, then rinse or wet-vacuum thoroughly.

Rinse / finish

04

Yes - rinse or wet-vacuum after dwell time

Verify

05

Confirm the required result, correct finish and safe condition before closing the task.

Close out

06

Reseal and return the product to storage, restore the work area and report any abnormal result or deviation.

Keep the chemistry controlled

More product, longer dwell time or mixing with another cleaner is not automatically safer or more effective. Stay within the current product instructions.

Compatibility and application limits

Confirm the material, surface or equipment before application; avoid preventable damage and rework.

01 Compatibility

Compatible after check

- Compatible hard floors listed in product literature

Verify before use

- Aluminium / alkali-sensitive finishes unless confirmed
- Unknown surfaces without spot testing

02 Operational value

01 Deep-penetrating formula

Supports consistent professional facility use when applied according to the current product instructions.

02 Solvent-boosted alkaline system

Provides alkaline cleaning action for the stated soil and professional application range.

03 Machine & manual application

Supports the stated professional application method when dosing and equipment controls are followed.

04 Reduces slip hazard

Supports removal of greasy soil that can contribute to unsafe floor conditions.

Incident response and escalation

Stop work early, protect people first, and use the current SDS and site emergency procedure.

Stop work

Any uncontrolled splash, acid/alkali cross-contact or loss of corrosive-duty PPE. Unexpected reaction, heat, fumes, odour or visible surface attack. Damaged or unlabelled container, uncertain product identity or uncertain compatibility. Splash/exposure event or uncontrolled spill.

01 First-aid summary

Eyes

Flush eyes with clean water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. Continue rinsing and seek medical attention if irritation persists.

Skin

Remove contaminated clothing. Rinse affected skin thoroughly with water. Wash with soap where appropriate. Seek medical attention if irritation, redness or pain persists.

Inhalation

Move the affected person to fresh air and keep at rest. If breathing is difficult or symptoms persist, seek medical attention. Follow the current SDS and site emergency procedure.

Ingestion

Do not induce vomiting. Rinse mouth with water. Do not give anything by mouth to an unconscious person. Seek medical attention promptly and provide the current SDS or product label.

02 Storage

Store in the original labelled container, tightly closed and upright, in a cool, dry, well-ventilated area. Keep away from incompatible materials and follow the current SDS Section 7 for product-specific storage conditions. Do not mix with other chemicals unless explicitly permitted by the current product instructions.
