Follow the current label and measure accurately.

6.5-7.5

PH / CHEMISTRY

Reference value from current product data.

5 Litres

PACK

Procurement / refill format.

WARNING - GHS07

H315 - Causes skin irritation. H319 - Causes serious eye irritation (concentrate).

01 What this guide helps you control

- Correct dose, dilution and application sequence for the intended task.
- Where the product fits, material limits and compatibility checks before use.
- PPE, stop-work conditions, storage and incident-response essentials.
- Direct access to the current SDS, technical documents and procurement resources.

Application scope and controls

Where the product creates value, what PPE is needed, and what must be confirmed before use.

01 Operational value

01

Warm sandalwood fragrance

Provides a controlled fragrance profile suitable for routine institutional environments.

02

Neutral pH 6.5-7.5

Supports routine use where the stated near-neutral chemistry profile is required.

03

Mild surfactant system

Supports effective soil removal and rinsing under the stated cleaning conditions.

04

Ready to use

Requires no dilution before routine application; follow the current label and site procedure.

02 PPE and task controls

Protective gloves

Eye protection

03 Pre-use verification

- 01

Read current SDS
Confirm current label/SDS and site procedure before use.
- 02

Confirm application
Use only for the intended task, surface, equipment or hygiene purpose.
- 03

Prepare the area
Control access, remove incompatible products and arrange ventilation where needed.
- 04

Prepare PPE
Use the PPE stated in the SDS/product literature for concentrate handling and task risk.
- 05

Prepare rinse / cleanup
Have water, wipes or approved cleanup materials ready before starting.

Controlled application sequence

Ready to use

Prepare

01

Read the current label/SDS, confirm compatibility, isolate the task area and prepare PPE.

standard

02

push-pump or sensor

dispense

03

r directly from the 5-litre pack.

Rinse / finish

04

Rinse hands thoroughly with water

Verify

05

Confirm the required result, correct finish and safe condition before closing the task.

Close out

06

Reseal and return the product to storage, restore the work area and report any abnormal result or deviation.

Keep the chemistry controlled

More product, longer dwell time or mixing with another cleaner is not automatically safer or more effective. Stay within the current product instructions.

Compatibility and application limits

Confirm the material, surface or equipment before application; avoid preventable damage and rework.

01 Compatibility

Compatible after check

- Frequent daily use - all skin types

Verify before use

- Confirm against current product literature and site requirements.

02 Operational value

01 Warm sandalwood fragrance

Provides a controlled fragrance profile suitable for routine institutional environments.

02 Neutral pH 6.5-7.5

Supports routine use where the stated near-neutral chemistry profile is required.

03 Mild surfactant system

Supports effective soil removal and rinsing under the stated cleaning conditions.

04 Ready to use

Requires no dilution before routine application; follow the current label and site procedure.

Incident response and escalation

Stop work early, protect people first, and use the current SDS and site emergency procedure.

Stop work

Unexpected reaction, heat, fumes, odour or visible surface attack. Damaged or unlabelled container, uncertain product identity or uncertain compatibility. Splash/exposure event or uncontrolled spill.

01 First-aid summary

Eyes

Flush eyes with clean water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. Continue rinsing and seek medical attention if irritation persists.

Skin

Remove contaminated clothing. Rinse affected skin thoroughly with water. Wash with soap where appropriate. Seek medical attention if irritation, redness or pain persists.

Inhalation

Move the affected person to fresh air and keep at rest. If breathing is difficult or symptoms persist, seek medical attention. Follow the current SDS and site emergency procedure.

Ingestion

Do not induce vomiting. Rinse mouth with water. Do not give anything by mouth to an unconscious person. Seek medical attention promptly and provide the current SDS or product label.

02 Storage

Store in the original labelled container, tightly closed and upright, in a cool, dry, well-ventilated area. Keep away from incompatible materials and follow the current SDS Section 7 for product-specific storage conditions. Do not mix with other chemicals unless explicitly permitted by the current product instructions.
