

Oxygen Bleach - Colour-Safe

Sodium Percarbonate with Active Oxygen Release, pH 10-11 + Colour-Safe Formula Stain Removal Without Chlorine for coloured & mixed institutional linen

10-20 gm

DOSE / DILUTION

Follow the current label and measure accurately.

10-11

PH / CHEMISTRY

Reference value from current product data.

5 Litres

PACK

Procurement / refill format.

DANGER - GHS03

H272 - May intensify fire; oxidiser. Keep away from combustible materials.

01 What this guide helps you control

- Correct dose, dilution and application sequence for the intended task.
- Where the product fits, material limits and compatibility checks before use.
- PPE, stop-work conditions, storage and incident-response essentials.
- Direct access to the current SDS, technical documents and procurement resources.

Application scope and controls

Where the product creates value, what PPE is needed, and what must be confirmed before use.

01 Operational value

01 Active oxygen stain removal

Provides the stated active concentration for the intended professional application.

02 Colour-safe

Supports stain removal while protecting compatible colour-fast textiles under the stated wash conditions.

03 pH 10-11 alkaline activation

Provides the stated alkaline pH profile for the intended soil and application range.

04 10-20 gm per load

Supports measured dosing across the stated dilution or application range.

02 PPE and task controls

Protective gloves

Eye protection

03 Pre-use verification

01 Read current SDS

Confirm current label/SDS and site procedure before use.

02 Confirm application

Use only for the intended task, surface, equipment or hygiene purpose.

03 Separate combustibles

Keep oxidiser away from combustible / reducing materials and contamination.

04 Prepare PPE

Use the PPE stated in the SDS/product literature for concentrate handling and task risk.

05 Prepare rinse / cleanup

Have water, wipes or approved cleanup materials ready before starting.

Controlled application sequence

10-20 gm

Prepare

01

Read the current label/SDS, confirm compatibility, isolate the task area and prepare PPE.

Dose / dilute

02

10-20 gm

Standard

03

wash addition add 10-20 gm to the washing machine drum with linen before the main wash cycle. Alternatively, add to the detergent compartment.

Verify

04

Confirm the required result, correct finish and safe condition before closing the task.

Close out

05

Reseal and return the product to storage, restore the work area and report any abnormal result or deviation.

Record

06

Record the task, dose/dilution and any deviation where the facility procedure requires traceability.

Keep the chemistry controlled

More product, longer dwell time or mixing with another cleaner is not automatically safer or more effective. Stay within the current product instructions.

Compatibility and application limits

Confirm the material, surface or equipment before application; avoid preventable damage and rework.

01 Compatibility

Compatible after check

- Coloured
- white cotton
- poly-cotton
- synthetics
- institutional linen

Verify before use

- Silk
- wool
- cashmere
- leather

02 Operational value

01 Active oxygen stain removal

Provides the stated active concentration for the intended professional application.

02 Colour-safe

Supports stain removal while protecting compatible colour-fast textiles under the stated wash conditions.

03 pH 10-11 alkaline activation

Provides the stated alkaline pH profile for the intended soil and application range.

04 -20 gm per load

Supports measured dosing across the stated dilution or application range.

Incident response and escalation

Stop work early, protect people first, and use the current SDS and site emergency procedure.

Stop work

Contact with combustible, reducing or incompatible material. Unexpected reaction, heat, fumes, odour or visible surface attack. Damaged or unlabelled container, uncertain product identity or uncertain compatibility. Splash/exposure event or uncontrolled spill.

01 First-aid summary

Eyes

Flush eyes with clean water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. Continue rinsing and seek medical attention if irritation persists.

Skin

Remove contaminated clothing. Rinse affected skin thoroughly with water. Wash with soap where appropriate. Seek medical attention if irritation, redness or pain persists.

Inhalation

Move the affected person to fresh air and keep at rest. If breathing is difficult or symptoms persist, seek medical attention. Follow the current SDS and site emergency procedure.

Ingestion

Do not induce vomiting. Rinse mouth with water. Do not give anything by mouth to an unconscious person. Seek medical attention promptly and provide the current SDS or product label.

02 Storage

Store in the original labelled container, tightly closed and upright, in a cool, dry, well-ventilated area. Keep away from incompatible materials and follow the current SDS Section 7 for product-specific storage conditions. Do not mix with other chemicals unless explicitly permitted by the current product instructions.
